- English

SUMMARY

Solution-driven and highly experienced WordPress Developer with over 7 years of hands-on experience. Successfully developed and delivered more than 100 high-quality websites for clients across diverse industries including e-commerce, healthcare, news portals, educational platforms, and corporate portfolios.

EXPERIENCES

Over the past 7 years, I have specialized in building custom WordPress websites tailored to diverse client needs, from corporate portfolios to full-featured e-commerce platforms. I've developed and maintained websites for clients in sectors such as education, fashion, cosmetics, hospitality, health care, legal services, and news media.

- A customized e-commerce platform for connecting startups with investors: 4mal.sa
- A multilingual medical trading website: Alpha Biotech
- A dynamic food delivery site with WooCommerce: MonChef UAE
- A cosmetics platform with admin tools: Taqat Cosmetics
- A high-traffic content blog: Article Everyday
- Each project involved end-to-end development: setup, theme customization, plugin integration, responsive design, and SEO-ready structure.

Custom Features & Technical Work

I've implemented advanced WordPress solutions based on project needs—whether building custom plugins, handling multilingual RTL/LTR switching, or integrating booking systems and payment gateways.

- Developed multilingual RTL websites with content management (VIP Portfolio, Palestinian Prisoners Center)
- Integrated client dashboards and report systems (AIG Saudi, Intertel UK)
- Handled high-security environments for legal firms and government-related websites (Kurdi Law, Lazure Hospitality)

Maintenance, Optimization & Troubleshooting

My role often extends beyond development. I regularly handle performance optimization, WordPress security, and bug fixing on existing websites. I've helped recover broken sites, migrated data, improved load times, and fixed issues caused by plugin conflicts or outdated themes.

- Repaired layout and language issues on Alpha Biotech
- Resolved SEO indexing and cache conflicts on Gaza Herald
- Enhanced loading speed and structure for Create Your Theme and Lazure Hospitality
